

Many of the examples use Bridgebase. Here are some notes on how to use it.

1. If you want to see just the dummy (North) and South's hands, click on the "South" name to hide/reveal the East-West hands.
2. If you want to see just one defender's hand and dummy, click one East or West to hide/reveal the other hands.
3. Use the Next/Prev button to show the recommended line of play.
4. If you want to switch to choosing your own line of play, click on the "Play" Button and then select the cards yourself.
5. The GIB Button will show you at any point how the tricks made will be affected by the card you play.
